

THE SWISS COTTAGE

ENVIRONMENTAL POLICY

The impact of Environmental issues, on the Island, as throughout the World, is influential on our everyday lives.

You can help us to meet our aim to minimise energy consumption whilst maximising the quality of provision during your stay.

- By using the same bed linen throughout your stay for or up to seven nights whichever is the longer, will save energy and water.
- Guests staying 8 nights or more, bed linen will be changed automatically mid way through your first weeks stay.
- Towels hung up to dry can then be re-used and saves on frequent washing and energy use.
- Towels will be automatically changed after three nights/your third morning for guests on a weekly stay.
- Please ensure that you remove your shoes, wash off any sand or outside dirt when you have been down the beach or out walking.
- Our Towels are not to be taken off the property.
- Soiled towels will be changed but please note we do not change towels every day as a rule.
- If you do want clean towels every day, then there is an extra charge of £1 per towel, to help towards the extra washing costs.
- Rubber & towelling foot mats are provided to avoid you slipping.
- In an attempt to save electricity and reduce the risk of fire, please do NOT leave the television or chargers etc on standby.
- Unplug appliances where possible.

THE SWISS COTTAGE

ENVIRONMENTAL POLICY

- The Central heating radiators are thermostatically set to provide a comfortable room temperature on arrival and during your stay.
- Small adjustments may be needed according to weather conditions.
- The hot water is also set at a comfortable temperature
- Although we use Motion Sensors and Energy Saver Bulbs (where possible) we ask that all lights are switched off when not required.
- Also please switch off your power supply to the showers & fans
- Please use our Recycle Bins provided in the Hall way, as we will then endeavour to recycle all plastics/paper in accordance with the Island's Environmental Refuse Policy. Hand Sanitizer are just above the bins.
- To minimise Food Wastage we adapt a Pre-Order meal system which enables us to ensure that only the quantity of food required is prepared.
- Our meals are prepared daily using fresh good quality produce and using local produce where possible and in accordance with our guest's requests and dietary needs.
- Enabling us to maintain our high standard and efficient service to our guests at all times. Please Help Us to Help You.

Thankyou for your co-operation and don't forget your slippers!

Christine & Keith Beckett Resident Proprietors

Here at The Swiss Cottage we are doing our bit for a Greener Planet and participate on World Earth Day. Are you?
